A STEADY PATH, CONNECTING THE WORLD'S TRUST

In a changing financial era, embracing the new
landscape with transparency and vision

Trust as a Bridge, Wisdom as a Navigator

Welcome to a new chapter in finance defined by trust and responsibility.

DG Investment Group sincerely thanks every partner for their attention, understanding, and commitment. Whether you come from the fields of capital, technology, or research, we believe that true and lasting growth stems from sound judgment and long-term thinking.

In this era of transformation, we value the importance of collaboration, ensuring that capital flows are directed and value accumulation has lasting depth. Every exchange and every collaboration is an important step towards the future.

We hope that through openness and professionalism, every conversation in global finance will be clearer, more trustworthy, and more enduring.

May this journey begin now.

DG INVESTMENT GROUP

Company Origins and Development

DG Investment Group, founded in 2020, emerged over the past few years amidst the profound convergence of finance and technology. The company's founding mission was to build a sustainable and trustworthy capital environment for global investors through a prudent, compliant, and innovative approach. From its humble beginnings as a regional institution, it has gradually grown into a comprehensive financial group with international influence.

Every step of its development has been built on the accumulation of practical experience and research. Whether in market research, asset allocation, or cross-border collaboration, DG Investment Group has always upheld transparency and responsibility. As its business portfolio expands, the company continuously optimizes its governance system to ensure that every step of growth is verifiable and every achievement stands the test of time.

Today, DG Investment Group has established a stable network of partners in major financial centers around the world. The past decade has been a period of not only expansion but also the consolidation of its philosophy. The company has rigorously addressed market changes, guided by a long-term perspective, and laid a solid foundation for continued growth over the next decade.

Corporate Vision and Mission

DG Investment Group's vision is to become a trusted global capital connector, driving sustainable growth through sound decision-making and a long-term perspective in complex and volatile markets. We believe that true financial power lies not in the pursuit of short-term gains, but in imbuing capital flows with order, meaning, and time value.

Our mission is to bring greater financial transparency and more direction to growth through research and collaboration. DG Investment Group adheres to a data-driven and rational approach, promoting compliance, internationalization, and intelligent development, ensuring that every business imbues itself with both social responsibility and professional depth.

In an ever-changing global landscape, we uphold the core principles of "trust, stability, and foresight" and strive to establish a balance across diverse markets. DG Investment Group's mission goes beyond managing capital; it aims to create long-term value that benefits capital, institutions, and society.

Core Philosophy and Values

DG Investment Group firmly believes that the foundation of finance lies in trust, which is built on transparency and accountability. Regardless of market conditions, the company always adheres to the principles of openness, prudence, and compliance, ensuring that every decision is understandable, traceable, and trustworthy.

Our values are built on "Integrity, Insight, and Sustainability." Integrity is the cornerstone of corporate development; insight is the ability to understand the market and human nature; and sustainability represents respect for time and growth. DG Investment Group uses these three principles as its guiding principles to shape its unique corporate culture and approach to judgment.

We believe that capital is not only a tool for allocating resources but also an extension of social values. Only when finance is long-term and inclusive can growth truly be meaningful. This philosophy guides every decision DG Investment Group makes globally, restoring the balance and rationality of finance to its proper place.

Business Structure and Service Areas (Part 1)

DG Investment Group's business system is centered on diversification and specialization, aiming to provide secure, transparent, and sustainable financial services to diverse clients. By integrating capital research, asset management, and technical support, the company has established a business framework encompassing global markets.

MAJOR AREAS INCLUDE

➤ EQUITY INVESTMENT

Focusing on high-quality companies and growth projects, we support innovation and stable development with medium- and long-term capital allocation, emphasizing value discovery and structural optimization.

➤ FINTECH INTEGRATION

Applying digital tools and data research to financial management processes, improving decision-making efficiency and risk monitoring capabilities, and achieving efficient integration of information and capital.

➤ ASSET MANAGEMENT

Provides multi-tiered asset portfolio services for both institutional and individual clients, focusing on the principle of balanced return and robust allocation.

➤ INTERNATIONAL SERVICE SUPPORT

Through cross-border collaboration and multi-regional team operations, we provide clients with investment research, compliance, and consulting support that meets international standards.

Prioritizing robustness and supplemented by innovation, DG Investment Group continuously optimizes its service structure to make capital operations more transparent, efficient, and sustainable.

Business Structure and Service Areas (Part 2)

DG Investment Group's services extend beyond traditional finance, focusing on synergizing global capital and realizing long-term value. Through continuous process optimization, the company has established a robust and flexible operational system, enabling organic linkages across its various sectors.

DG INVESTMENT GROUP

DG Investment Group views financial services as a long-term construction process rather than a pursuit of short-term results. Every investment is a stepping stone towards a more stable and responsible financial future.

BUSINESS OPERATION FOCUS:

➤ THE MULTI-TIERED CLIENT SYSTEM

serves institutional funds, family offices and high-net-worth clients, providing customized asset solutions and global allocation recommendations.

➤ RESEARCH-DRIVEN DECISION-MAKING

is based on data and market research, ensuring that every decision is based on the intersection of facts, trends and rationality, reducing fluctuations caused by uncertainty.

➤ THE LONG-TERM RETURN MECHANISM

emphasizes steady growth and risk balance, uses time as a measure of value, and enables capital accumulation and social responsibility to go hand in hand.

➤ CAPITAL SYNERGY PROMOTES

the symbiosis of capital, knowledge and resources through cross-market and cross-sector cooperation, giving every investment extended value.

Sub-brands and Technical Support

DSWEX LTD is a key technology and trading brand within DG Investment Group , specializing in providing cross-market data connectivity and intelligent matching support. It serves not only as a technical support arm but also as the core engine driving the group's globalization and digitalization efforts.

The brand is built on a foundation of security, stability, and adaptability, integrating regulatory requirements and market mechanisms across multiple jurisdictions to create a high-standard trading and monitoring system. While ensuring compliance, DSWEX LTD prioritizes the coordination of information, capital, and operational flows, enabling the group to maintain consistency and transparency across diverse market environments.

Within the DG Investment Group, DSWEX LTD plays a key role in connecting front-end research with back-end execution. It enables strategy validation, operational traceability, and efficient collaboration across global teams. Through this brand, DG Investment Group achieves technological integration from conception to execution, from local to global.

Global Layout and Regional Operations

DG Investment Group

DG Investment Group has established an international business network spanning North America, Europe, and Asia. The firm maintains research, management, and partnership centers across various regions, creating a collaborative structure spanning multiple time zones to ensure stable and consistent global capital operations.

DG INVESTMENT GROUP

In North America, the firm focuses on capital management and research center development; in Europe, it focuses on regulatory compliance and cross-border collaboration; and in Asia, the team is responsible for innovative investment and market development. This distributed layout enables DG Investment Group to synchronize and share market information and resources globally.

Through its international operations, the company ensures that each business complies with local regulatory standards and, on this basis, pursues greater governance transparency. DG Investment Group's global presence is not merely a physical expansion; it represents a long-term commitment, supporting global trust with local understanding, enabling the continuous flow and steady growth of capital across diverse markets.

Compliance and Governance Structure

In terms of governance, the company has established a management structure that is both vertically integrated and horizontally coordinated. The Board of Directors is responsible for determining strategic direction and risk boundaries, the Executive Management Committee is responsible for policy implementation and resource allocation, and the Risk Control Committee and Compliance Department operate independently, assuming responsibilities for review, assessment, and oversight. This structure of checks and balances ensures DG Investment Group maintains stability and self-discipline in a rapidly changing financial environment.

Compliance is a core principle of all DG Investment Group operations. Since its inception, the company has strictly adhered to the regulatory requirements of the U.S. and major international financial markets, ensuring that its operations adhere to legal and industry standards in all regions. Every business process, from investment assessment and client onboarding to fund management and information disclosure, undergoes standardized review and continuous oversight to ensure transparency, clear accountability, and traceable data.

The company firmly believes that compliance is not a passive constraint, but rather a guarantee of sustainable development. Transparency and standardization not only protect investor interests but also enhance a company's international reputation. Through institutionalized governance mechanisms, DG Investment Group transforms trust into systemic security and confidence, making robustness its most competitive attribute. Going forward, the company will continue to strengthen global regulatory coordination and improve its cross-border audit mechanisms to ensure that every decision stands the test of time and regulation.

Research and Analysis Capabilities

DG Investment Group considers research capabilities the foundation of its robust growth. The company has established a research system comprised of experts in economics, financial engineering, and data science. This system, centered on multi-dimensional data analysis and market validation, provides a scientific basis for investment decisions. Through long-term monitoring of the macroeconomy, industry cycles, and regional policies, the research team ensures that every judgment is based on solid facts and logic.

DG INVESTMENT GROUP

DG Investment Group considers research capabilities the foundation of its robust growth. The company has established a research system comprised of experts in economics, financial engineering, and data science. This system, centered on multi-dimensional data analysis and market validation, provides a scientific basis for investment decisions. Through long-term monitoring of the macroeconomy, industry cycles, and regional policies, the research team ensures that every judgment is based on solid facts and logic.

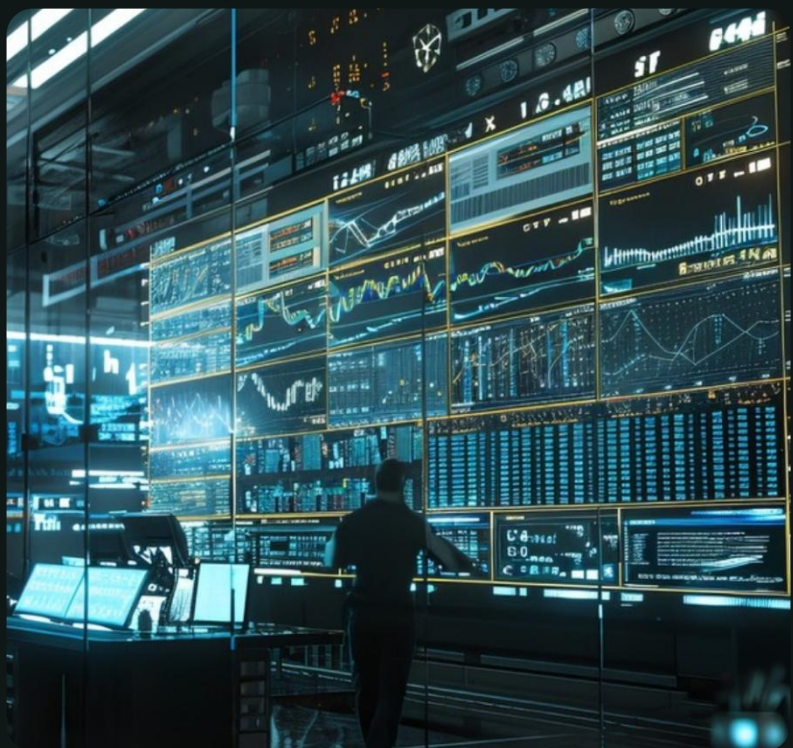

DG Investment Group believes that research is more than just the accumulation of data; it's the extension of knowledge. Scientific analytical methods enable the company to identify true value in complex markets, while sustained investment in research ensures its future professional leadership. Through a data-driven decision-making system, the company has achieved a shift from understanding the market to shaping it, providing deeper insights and support to global clients.

Strategic Cooperation and Alliance

DG Investment Group understands that in an era of globalization and specialization, collaboration is key to sustainable growth. The company maintains long-standing partnerships with international financial institutions, research institutions, and regional investment groups, establishing multi-layered strategic alliances across compliance, research, asset management, and technical support. These collaborations not only expand its business scope but also enhance its adaptability and integration capabilities in the global market.

In cross-border collaborations, the company adheres to the principles of "mutual trust, mutual benefit, and shared progress." Each collaboration is guided by a shared goal : promoting market transparency, enhancing research depth, and strengthening capital allocation efficiency. Through joint research initiatives, data sharing mechanisms, and experience exchange, DG Investment Group has built an open network of knowledge and resources, enabling the exchange of expertise across different regions.

The company believes that the value of collaboration lies not only in resource integration but also in shared values and responsibilities. DG Investment Group will continue to expand the depth and breadth of its global alliances, leveraging its robust governance foundation, professional investment research capabilities, and long-term relationships of trust to jointly build a forward-looking, inclusive, and sustainable global financial ecosystem.

Risk Control and Trust Mechanism

Risk management is a core pillar of DG Investment Group's long-term, stable operations. The company has established a comprehensive risk identification, assessment, and control system, integrating market, credit, liquidity, and operational risks into a unified framework. Every business undergoes multi-dimensional review and stress testing before launch to ensure potential risks are quantifiable, monitorable, and manageable, thereby providing a highly secure capital environment for clients and partners.

DG Investment Group

The company has an independent risk management committee responsible for reviewing investment strategies, asset allocation, and liquidity structure, and regularly updating internal risk models. This mechanism, combined with external audits and internal review systems, enables the company to maintain a balance between flexibility and robustness in a complex market environment. Furthermore, DG Investment Group utilizes data tracking and dynamic early warning systems to monitor global market fluctuations in real time, providing immediate support for decision-making.

Trust is built on transparent communication and verifiable behavior. DG Investment Group adheres to the principles of "openness, accountability, and traceability," transforming trust into institutionalized safeguards. Whether it's protecting client information, managing funds, or complying with compliance reporting, the company adheres to the highest standards. It's this sustainable trust structure that has earned DG Investment Group respect and enduring partnerships worldwide.

Industry Trends and Market Outlook

The global financial industry is undergoing a period of profound transformation. Macroeconomic uncertainty, policy adjustments, and the continued acceleration of technological innovation are reshaping the structure of the capital market. Traditional financial institutions are shifting from a single-source profit focus to a long-term value creation model centered on sustainability, accountability, and transparency. DG Investment Group sees this trend as an opportunity, believing that stability and compliance will become true competitive advantages in the future.

Digitalization and intelligence have become the driving forces of industry development. Data-driven decision-making, cross-regional information collaboration, and automated management mechanisms are transforming the very logic of capital operations.

Through continuous research investment and systematic development, DG Investment Group actively absorbs emerging global technologies, transforming them into tools for improving efficiency and governance quality, rather than short-term goals.

DG INVESTMENT GROUP

Looking ahead, the international financial system will place greater emphasis on cooperation and unified regulation. Capital flows will be based on trust, and innovation will be guided by responsibility. DG Investment Group will continue to uphold the core principles of prudence, transparency, and foresight, promoting more orderly and secure capital flows globally and contributing to the long-term balance and sustainable development of the financial industry.

Social Responsibility and Sustainable Development

DG Investment Group firmly believes that the true value of finance lies not only in capital growth but also in its positive impact on society and the environment. The company integrates sustainable development into its daily operations and investment decisions, striving for returns while fulfilling its responsibilities to society, the environment, and future generations. Every capital flow is a force for positive change, and every project evaluation is measured by its long-term impact.

In terms of corporate governance, DG Investment Group is guided by ESG principles and focuses on key issues such as energy transition, green innovation, and social equity. The company actively participates in the international Responsible Investment Initiative (PRI) and regional public welfare projects, promoting a virtuous cycle of capital between environmental protection and social development. Through professional research and financial guidance, the company is committed to translating sustainable concepts into quantifiable and traceable results.

DG Investment Group believes that sustainable growth is only meaningful when companies assume responsibility as they grow. Sustainable development is not a subsidiary objective, but an integral part of corporate strategy. Going forward, the company will continue to deepen its research on green finance, strengthen the impact of social investment, and use sound financial thinking to build a more resilient global future.

Future Planning and Long-term Strategy

DG Investment Group's future planning is centered on the philosophy of "seeking progress amidst stability, and controlling near-term risks with long-term ones." The company will continue to deepen its global presence, while maintaining compliance and prudence. It will strengthen its research capabilities, expand its investment areas, and establish strategic cooperation centers in more regions to enhance its collaborative management of global capital flows.

In the long term, the company will focus on three major areas: first, continue to strengthen research-driven decision-making mechanisms, making data and trend analysis the core assets of the company; second, promote the integration of capital and technology, and explore more efficient investment and management models; third, consolidate the international cooperation system, expand the resource network through alliances and collaborations, and enable global business to form a structure of long-term mutual trust and value symbiosis.

DG Investment Group believes that true growth comes not from speed but from structure and the accumulation of time. The company will continue to uphold a long-term approach, guided by transparency and guided by responsibility, to balance the power of finance between stability and innovation. Going forward, DG Investment Group will continue to build a future-oriented capital landscape with a global perspective and forward-thinking thinking.

Corporate Culture and Team Spirit

DG Investment Group believes that an exceptional corporate culture is the root of long-term competitiveness. The company consistently prioritizes professionalism, trust, collaboration, and foresight as its core values. We encourage employees to strike a balance between stability and innovation, driving organizational growth through responsibility and creativity. Regardless of their role in research, management, or investment, every member is guided by long-term value and collaborates on transparent communication.

DG Investment Group's most important asset is its teamwork. The company has established a cross-regional collaboration mechanism, enabling talented individuals from diverse cultural and professional backgrounds to work together towards a common goal. Through knowledge sharing and open communication, the company has fostered a multi-layered, international, learning-oriented team, ensuring that decision-making is both comprehensive and insightful. Furthermore, the company prioritizes professional training and career development, enabling each member to realize their own value through personal growth.

This culture not only fosters internal cohesion but also ensures the stability of external collaboration. DG Investment Group, with its humanistic spirit at its core, extends trust between the organization, its clients, and society, fostering a mutually supportive community of values. It is this cohesion and dedication that enables the company to maintain its continued vitality and resilience within the global financial system.

Social Impact and Brand Reputation

Brand reputation is one of DG Investment Group's most valuable long-term assets. The company believes that reputation is built not through communication but through sustained action and results. Since its founding, DG Investment Group has earned market trust through robust performance, transparent governance, and responsible decision-making, making its brand synonymous with professionalism and integrity.

DG INVESTMENT GROUP

At the social level, the company actively participates in financial education, public welfare programs, and industry knowledge dissemination, promoting a deeper understanding of capital operations and risk awareness among the public. DG Investment Group believes that finance not only serves the market but also contributes to the stability and development of social structures. Through long-term social investment, the company hopes to enable more people to share the positive benefits of finance and ensure that the power of capital truly returns to society.

Building an international brand is not only reflected in business scale, but also in shared values and unified standards. DG Investment Group has earned recognition from its international partners for its openness, prudence, and responsibility. Going forward, the company will continue to build a sustainable and trustworthy corporate image within the global financial system, building its brand into a bridge of trust around the world, based on its reputation and bridging trust.

DG INVESTMENT GROUP

DG Investment Group
// White paper

Trust is DG Investment Group's unwavering starting point. Throughout its journey, the company has maintained clarity and prudence amidst the ever-changing financial landscape, building confidence through responsibility and accumulating value through time. Every collaboration and every decision reflects the company's commitment to long-termism and bears witness to the power of professionalism and integrity.

Looking back, our steady growth is no accident; it stems from continuous investment in transparency, compliance, and foresight. On our global journey, DG Investment Group has never pursued short-term success. Instead, we have built on systems as our foundation and research as our guiding principle, aligning capital with trust and ensuring our achievements stand the test of time.

Looking ahead, the company will continue to embrace change with an open mindset and build a sustainable growth path with rationality and foresight. No matter how the times evolve, DG Investment Group will remain committed to returning finance to its essential principles, empowering the stability and development of human society, and making trust a common language that transcends time.

Trust as a Bridge, Wisdom as a Navigator
